

Strengthening Capacity for Effective CPM Implementation in Central Counties

Proposed AIM

Building on counties' strengths and unique infrastructures, CCTA's aim is to design and operationalize a system of support that attends to executive, cross-agency, and day-to-day leadership and management functions necessary for effective implementation of the CA Practice Model and any integrated practice and system improvement. In partnership with key county stakeholders, CCTA Implementation Support Team members can provide facilitative coaching and consultation so that counties can meet their desired objectives as they implement the CPM across the stages of implementation, starting with the Exploration Stage. Effective implementation requires clarity and agreement about the explicit, stated intervention and how it fits within the county context and serves the mission of the organization. The intervention must be defined, clearly understood, realistic, and possible to implement.

CCTA's CPM Implementation Support Team can schedule an on-site implementation support planning conversation. Potential topics described below:

1. Half-day overview of the CPM, including a review of key implementation strategies that counties can utilize to support the use of the CPM
2. Half-day overview of CPM and orientation to the CPM Implementation Snapshot and Planning Template
3. Half-day overview of CPM and the role of leaders in building "organizational readiness" for CPM implementation
4. Half-day overview of CPM, including planning conversation with key teams (Leadership Team and/or Implementation Team) designed to support county teams in planning next steps
5. Half-day overview of "role of key teams" in supporting CPM implementation
