

July-December 2020 CCTA CPM IST Roadmap

CCTA's IST continues to develop capacity to support counties with CPM implementation effectiveness

IST will participate in implementation boot camps, Cross-RTA meetings, and all available avenues designed to build our capacity to provide CPM implementation support in the Central Counties (for the Child Welfare Directors, their key leaders, and to respective implementation teams in counties).

IST will provide tailored implementation support to each central county as requested.

Support for Multi-Layers of County Leadership

IST will engage Central Regional Managers to co-design a **CPM for Supervisors** webinar series designed to equip supervisors with good understanding of CPM and its important purpose, and to launch practice, feedback, coaching, and skills around the use of data to measure implementation within units. The IST will actively involve the managers of the cohort supervisors throughout the process.

IST will support use of CPM as framework for ICPM and CFT

IST will support counties as they engage supervisors and social workers in the use of CPM to build readiness for agency participation in the CANS-informed CFT (primary vehicle within the cross-agency ICPM). IST will work to convey the intersection between the CPM and the ICPM, and to incorporate these key messages in all training and implementation support activities.

Regional Support for CW Directors will continue

IST will support Directors' Institute through the DI's webinar series: *"Using the Covid Context to Lean into REI"*

IST will continue to provide tailored support to CW Directors via CWDA, and will be ready to engage in planning conversations with directors related to county specific work.
